

Τετάρτη, 25 Απριλίου 2018 στις 10:00 πμ -  Επιστημονικό & Τεχνολογικό Πάρκο Ηπείρου - Αίθουσα Συνεδριάσεων.

3ο Ζωντανό Εργαστήριο Συμμετοχικού Σχεδιασμού

Σας καλούμε να συμμετάσχετε τη **ΤΕΤΑΡΤΗ 25/04/2018 και ώρα 10:00 π.μ** στο 3ο Ζωντανό Εργαστήριο Συμμετοχικού Σχεδιασμού στο Επιστημονικό & Τεχνολογικό Πάρκο Ηπείρου - Αίθουσα Συνεδριάσεων.

Το εργαστήριο στοχεύει στη δημιουργία ομάδων εργασίας και ενός «ζωντανού» σχήματος ενεργών πολιτών, που θα ασχοληθεί με τις επιμέρους θεματικές ενότητες για τον ανασχεδιασμό του παραλιμνίου μετώπου, καταθέτοντας απόψεις, προτάσεις και ιδέες προκειμένου να διαμορφώσουμε από κοινού το όραμα μας για την πόλη μας.

Η δράση πραγματοποιείται στο πλαίσιο του έργου «Resilient Europe» <http://urbact.eu/-resilient-europe> του προγράμματος Εδαφικής Συνεργασίας URBACT III <http://urbact.eu/>.

3rd LIVING LAB OF PARTICIPATIVE PLANNING ON 25 APRIL 2018

Structuring an action plan for the lakeside front

The 1st and 2nd workshops have produced very useful conclusions and best illustrated the views of the citizens on the lakeside front. It has been proven that there can be real participation in the city's wider planning and decision-making around it, in order to shape the vision and an action plan for the redevelopment of the lakeside front.

On **Wednesday, 25 April, at 10:00**, a further step is taking place, in order to activate as many citizens as possible in the process and support the establishment of a consistent culture of consultation in the Municipality of Ioannina. In the Science & Technology Park of Epirus, the 3rd living lab workshop will take place.

With free access to the workshop, citizens will discuss with each other and with representatives of the Municipality their vision for the redesign of the urban lakeside front.

Their statements will be posted on the consultation platform of the Municipality of Ioannina. The process will be supported by the "Resilient Europe" project team of the Municipality of Ioannina.

The 3rd Living Lab is the last of a series of workshops that took place under the framework of the "Resilient Europe" program and builds on the workshops that preceded it with wide participation.

The results of the public consultation will be taken into account in the design and preparation of the Masterplan for the redesign of the urban lakeside front, which is being drafted by the Municipality as part of the "urban resilience" project.

The action is implemented under the framework of the project "Resilient Europe" <http://urbact.eu/resilient-europe> of the program URBACT III <http://urbact.eu/>.
